

First Zurich Trust AG is partnering with the nation's leading educational institutions, to launch the ***FZT Financial Education Program***.

This program provides access to a series of, interactive personal finance courses for learners of all ages. Whether you're trying to teach your school child the value of money, talk to your teenager about how to secure his/her financial future, or give your millennial confidence as they manage their finances on their own for the first time, there is a course available to introduce important financial concepts at key life stages.

Our hope is that this program will inspire meaningful ***dialogue*** about money within your family, and the financial institutions you are currently using and encourage everyone to learn responsible money habits and begin planning for their financial futures.
